Speaking From The Body: Latinas On Health And Culture

Synopsis

In compelling first-person accounts, Latinas speak freely about dealing with serious health episodes as patients, family caregivers, or friends. They show how the complex interweaving of gender, class, and race impacts the health status of Latinas and how family, spirituality, and culture affect the experience of illness. Here are stories of Latinas living with conditions common to many: hypertension, breast cancer, obesity, diabetes, depression, osteoarthritis, rheumatoid arthritis, dementia, Parkinson's, lupus, and hyper/hypothyroidism. By bringing these narratives out from the shadows of private lives, they demonstrate how such ailments form part of the larger whole of Latina lives that encompasses family, community, the medical profession, and society. They show how personal identity and community intersect to affect the interpretation of illness, compliance with treatment, and the utilization of allopathic medicine, alternative therapies, and traditional healing practices. The book also includes a retrospective analysis of the narratives and a discussion of Latina health issues and policy recommendations. These Latina cultural narratives illustrate important aspects of the social contexts and real-world family relationships crucial to understanding illness. *Speaking from the Body* is a trailblazing collection of personal testimonies that integrates professional and personal perspectives and shows that our understanding of health remains incomplete if Latina cultural narratives are not included.

Book Information

Paperback: 264 pages

Publisher: University of Arizona Press (November 20, 2008)

Customer Reviews

Speaking from the Body: Latinas on Health and Culture is one of the best books on the subject to date. A brave and new take on a wide range of health topics related to Latinas in the US:

hypertension, breast cancer, obesity, diabetes, depression, osteoarthritis, rheumatoid arthritis, dementia, Parkinson's, lupus, and hyper/hypothyroidism. A book that physicians, patients and caregivers must read. Speaking from the Body is part illness narrative, part autobiographical, and part testimonial, and it fills a gap in health studies.
