Customer Reviews

I love this book. I use it all the time. I especially like the pics of the meds since many clients come in saying they took "the orange pill". It helps identify what meds they are taking. I often use it to

educate my clients about the medication, the side-effects, what to look for, what to avoid, how to take it. It helps me support my clients more. I highly recommend it.

As a PDR this is a valuable resource -- but for \$ 20-\$28 you can also purchase Pocket Psych Drugs by Darlene Pedersen as a kindle version or print version on . Fits in your pocket and covers over 70 full psychotropic monographs (pharmacokinetics, contraindications, indications, dosages, adverse reactions, pregnancy/lactation considerations), but also includes for every drug -- geriatric and pediatric considerations, clinical assessments, clinical tips/alerts and substance abuse considerations where relevant and other helpful information (labs, BMI etc).

I highly recommend this book for professionals who work in the mental health field or for those who work in Child Protection or a related field that might need a quick reference for medications that their clients might be on if you aren't already familiar with it.

PDR Drug Guide for Mental Health Professionals This is a smaller version of the Physician PDR specifically for Mental Health practitioners. It is up to date, easy to use and is the first source I use regarding medication. I order one every year...every year more psychotropic medications become available.

This book provides current information regarding drugs clients may be taking, their side effects, alternatives, symptoms, etc. A must-have for any counselor's desk.

This is a great guide. I used it all the time. I wish they would revise it as there are many updates and new information since 2007.

I am a recovering addict who has been on a abundance of different psyche drugs in the past! This book was a great help with educating myself on different side affects of those drugs! i recommend this book to anyone whos looking to have drug info at ur fingertips!

I use this guide in my work all the time. I teach classes in a correctional institution and it helps some of the inmates get a better perspective of what they are taking and what for.
