Keys To The Trematoda (Cabi)

Synopsis

This is the third of three volumes of Keys to the Trematoda, a series on the systematics and identification of the Class Trematoda. It covers five superfamilies with the Order Plagiorchiida and the family Didymozoidae, with the keys for their identification at the family, subfamily and generic levels. It also includes a key to all digenean superfamilies, including those treated in detail in volumes one and two.

Customer Reviews

I am a Korean, major in Parasitology. Among the fields of parasitology, I have interested in the intestinal trematode, especially crab-mediated microphallids. However, to study microphallid is very difficult for me because there have been few books on this subject. I wrote the articles on microphallids based on the old articles written in 1950s. Hence, this book is a sweet rain for me. Thank you for the authors and publishers.
